DIMENSIONS

Weight 1,8 Kg
225mm x 330mm x 225mm (L x H x B)

STANDARDS

Portable mosquito killer ST-MK01 is the patent design with best effective in the current market, why it is the best product? Because it has not only good appearance on the surface, chemical-free and friendly to people and pets but high quality of all of its components are safety approved by CE standard and staff in the R&D with more than ten years experience.

It uses biotechnology, air-current and optics technical to rid areas of flying insects. Flying insects are attracted to UV light. A built in sucking fan sucks in the insects which are killed upon contact with the electric grids.

It is chemical-free and environmentally friendly to people and pets. Ideal for indoor use, such as bed-room, kitchen, small shops, etc.
